

# ETHAN (TAEHOON) LEE

US Permanent Resident · ethantlee21@gmail.com · taehoonlee.dev · linkedin.com/in/ethantlee · github.com/thdxg

## EDUCATION

### Carnegie Mellon University

MS in Computer Science

Pittsburgh, PA

Expected May 2028

### Emory University

BS in Computer Science, BS in Psychology

Atlanta, GA

May 2026

• **Honors:** 4.0 GPA, Summa Cum Laude, 2x James T Laney Scholarship, 5x Dean's List, Phi Beta Kappa honor society

## WORK EXPERIENCE

### Founding Engineer

Huddle Surety (Techstars Pre-Accelerator)

Atlanta, GA

Sep 2025 – Present

- Architected a multi-tenant, polyglot SaaS for surety bond processing with Go, Next.js, and Python orchestrated via Temporal
- Built a multi-stage RAG pipeline using Python and pgvector, achieving 95% accuracy and 90% manual processing reduction
- Deployed a highly available container-based microservices architecture with LGTM stack observability, ensuring 99% uptime

### Software Engineering Intern (Cloud Infrastructure)

UKG

Atlanta, GA

May 2025 – Aug 2025

- Developed a production-grade REST API in Go to efficiently aggregate real-time network health of on-premise MongoDB, MySQL, and RabbitMQ VM deployments across 4 datacenters in the US using Docker, OpenTelemetry, and Prometheus
- Automated TLS certificate lifecycle monitoring via Kubernetes CronJob, accelerating annual renewal process by 70%
- Implemented distributed network observability by provisioning Prometheus Blackbox Exporters across OpenStack tenants

### Software Engineering Intern

eStreamly

Atlanta, GA

Jun 2024 – Aug 2024

- Optimized global state management and caching in frontend with TypeScript and Angular, reducing page load time by 40%
- Managed Docker image release pipelines on GCP Cloud Build, automating deployment processes and reducing release time

### Research Assistant in HCI

Emory University CAV Lab

Atlanta, GA

Nov 2023 – Dec 2025

- Published in ACM CHI 2026 modeling user listening behaviors through personal informatics and music streaming data
- Aggregated 100+ GB of streaming history from 60 Spotify users using Python for comprehensive analysis and visualization

## PROJECTS

### Kubernetes Open-Source Contribution

kubernetes.io

- Contributed to Kubernetes open-source project as an active member of the SIG Docs, specializing in internationalization
- Localized documentation on Kubernetes scheduler concepts, ensuring terminology accuracy and clarity for Korean audiences

### Kubernetes Homelab

github.com/overburrow

- Architected a bare-metal K3s cluster on two Raspberry Pis, utilizing Ansible for idempotent node provisioning, Cilium for cluster networking with Gateway API, ArgoCD for declarative GitOps workflow, and Prometheus for metrics observability
- Engineered a hybrid networking mesh combining Cilium CNI with Tailscale VPN as the underlay transport and solved complex MTU fragmentation issues by implementing custom packet clamping rules to bypass standard VXLAN encapsulation

### Emory Hacks: Emory University's Student-Run Hackathon

emoryhacks.com

- Co-founded Emory's first hackathon organization and developed annual hackathon website using Next.js and TypeScript
- Secured 200+ participants and sponsorships of \$20K+ from major firms including JPMorgan, Hyundai, and WolframAlpha

## SKILLS

- **Languages:** Go, JavaScript, TypeScript, C, Rust, Java, Python, SQL, HTML, CSS, Bash, Nushell, Typst, LaTeX
- **Cloud-Native Technologies:** Kubernetes, Linux, Docker, Helm, ArgoCD, Ansible, Prometheus, OpenTelemetry, Grafana
- **Tools:** Git, AWS (S3, Lambda, Cloudfront), GCP (Cloud Run, AlloyDB), Cloudflare (Workers, R2), Redis, SQLite, PostgreSQL
